

ZEPU-TQ10、ZEPU-TQ20、ZEPU-TQ30 ELECTRIC TRACTION BED SERIES PRODUCT

Excellent choice for neck and waist pain

ZEPU-TQ30

SPINAL TRACTION THERAPY —THE BEST SOLUTION FOR NON-INVASIVE CERVICAL AND LUMBAR DISEASES

Traction therapy has been widely proven to be one of the effective treatment methods for chronic cervical and lumbar diseases.

Reasonable distribution of traction weight, angle, time, and intervals by intelligent prescription to form an effective treatment. The force is applied

SPINAL DECOMPRESSION THERAPY—IMPROVING SPINAL PHYSIOLOGICAL EFFECTS TO HUMAN TISSUES TO ACHIEVE THERAPEUTIC GOALS

Analgesic effect:

Reducing α the excitability of motor neuron

Physiological effect:

Loosening facet joints and other small joints in the vertebral body and spinal muscles

Mechanical effect:

Mechanical separation of vertebral body

Extension of ligaments and small joint capsules

Enlargement of intervertebral foramen

Straightening of physiological curvature

CERVICAL INDICATIONS

Painful spasms of neck muscles; Cervical degenerative disc disease; Prevertebral disc protrusion (swelling)

Cervical spinal nerve root stimulation or compression; Cervical degenerative osteoarthritis

Cystitis of intervertebral joint; Cervical anterior and posterior longitudinal ligament lesions

LUMBAR INDICATIONS

Lumbar disc herniation; Lumbar degenerative disc disease; Lumbar facet joint dysfunction

Lumbar degenerative osteoarthritis; Painful spasms or strains of lumbar muscles

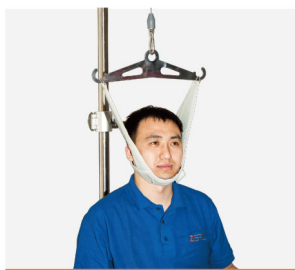

ZEPU-TQ10

ZEPU-TQ20 Electric Traction Bed

PRODUCT FEATURES:

1. Three traction modes meet treatment needs.
2. Main and auxiliary traction forces with gentle movements.
3. Internal anti traction program and external emergency stop remote control provide dual safety protection.
4. Dual channel design can carry out neck and waist traction at the same time.
5. Optional heated mattress

ZEPU-TQ10/ZEPU-TQ20 Parameters

Model	ZEPU-TQ10	ZEPU-TQ20
Power	220V/50Hz	220V/50Hz
Capacity	500VA	500VA
Traction speed	4mm/s	4mm/s
Lumbar traction force	10-800N	10-800N
Cervical traction force	10-190N	10-190N
Total time	1-99min	1-99min
Duration	1-60s	1-60s
Intermittent time	1-60s	1-60s
	Computer control: The digital tube displays time/traction force/traction automatic compensation /real-time traction force, and 8 different traction modes.	Computer control: The digital tube displays time/traction force/traction automatic compensation function/real-time traction force, and 8 different traction modes. It can provide traction therapy for two persons at the same time.

ZEPU-TQ30

ZEPU-TQ30

ZEPU-TQ30 Electric Traction Bed

THE MULTI-POSITION BED COMBINED WITH INTELLIGENT CONTROL SYSTEM MAKES TRACTION THERAPY MORE INTELLIGENT, COMFORTABLE, AND EFFICIENT.

ZEPU-TQ30 provides an intelligent control system, it adopts LCD touch screen with 5 build-in treatment and 99 customizable prescriptions. Multi-position bed configuration, the bed can be smoothly lifted and lowered for traction angle setting.

During the traction process, the bed separates itself to reduce friction loss, and the bed is adjusted in 6-fold sections to provide the best traction position for patients.

Innovative V-shaped occipital design neck traction device makes neck traction safer and more comfortable, and traction position more precise.

Parameters of ZEPU-TQ30 :

Weight: main machine:15KG/bed; 122KG	Maximum traction force: 90KG \pm 20%
Size:main machine430 \times 200 \times 360mm Bed:2800 \times 700 \times 600-1050mm	Treatment time(min.): 0-99 \pm 30s
Treatment mode: five build-in and 99 customizable prescriptions	raction speed: rising speed:0.9mm/sec-1.8mm/sec.allowance \pm 10% falling speed:0.9mm/sec-1.8mm/sec.allowance \pm 10%
